Important: Please Read

- Sussex County is trying to further enhance its 911 system.
- We are asking residents to contact their local telephone company to verify their 911 address. This must be done regardless of your billing address.
- Your telephone company's phone number can be found on your bill.
- Having your address correct with the telephone company and properly displaying 3-inch reflective numbers on your mailbox or 4-inch reflective numbers on your house can greatly improve your chances in an emergency.
- If you have any questions, please contact the Mapping & Addressing office at (302) 855-1176.

For more information, refer to the Enhanced 911 System link.
